## PROFILE SUMMARY

- Focused professional with **nearly 5 years** of experience in Supply Chain Management.
- Expert in configuring and implementing Oracle setups for Oracle Cloud and R12 E-Business Suite modules, including Project Manufacturing, **Work in Process**, **Bill of Materials**, and Inventory.
- Proficient in utilizing analytical tools (such as Excel) to assess Supply Chain performance and identify improvement opportunities.
- Capable of process improvement, enhancing operational efficiency through innovative solutions and effective **resource management**.
- Skilled in developing comprehensive reports and presentations that translate analytical findings into clear, actionable recommendations for stakeholders.
- Knowledge of **risk management** strategies and **compliance regulations** relevant to supply chain and logistics operations.
- Engaging with business stakeholders to elicit and document **SCM requirements**, then translate those into **Oracle system configurations**.
- Experienced in designing and implementing robust data management systems and analytics strategies that enhance data quality and operational efficiency.
- Proficient in sourcing and maintaining data from primary and secondary sources, ensuring smooth integration and ongoing analysis.

## WORK EXPERIENCE

Senior Associate Consultant | Infosys Ltd. | Bengaluru | Jun'22 – Present

- Successfully led 100% end-to-end implementation and managed critical data migration activities, ensuring seamless transitions.
- Collaborated as a liaison between the ERP team and business units to write functional design documents in the PTP area, focusing on 70% improvements in inventory and advanced procurement processes.
- Designed and automated 95% of Master Data changes (Forecast, Item, BOM, Routings, Resources, Sourcing rules) to Oracle ERP modules, including Mass Changes for business entities (Part attributes, Categories, Resource usages), leading to significant efficiency gains.
- Delivered comprehensive post-go-live support by troubleshooting and resolving 100% of identified issues, ensuring optimal and sustained system performance.

Analyst | KPMG Global Services Pvt. Ltd. | Bengaluru | Mar'20 – Jun'22

- Created and maintained **100% of key implementation documentation** including Setup Documents (BR100), Functional Test Scripts (TE20), Functional Design Documents (MD50), and User Training Manuals, adhering to AIM methodology.
- Collaborated with Business and IT teams to gather requirements, analyze functional specifications, and design solutions, contributing to **90% successful execution** of SIT and UAT testing phases.
- Resolved **95% of client escalations** by delivering effective solutions within specified timelines, ensuring high client satisfaction.
